Dear guests,

the Baltic-Sea-Campground "Gut Ludwigsburg" welcomes you and wishes you a pleasant holiday here.

We would like to draw your attention to some facts:

In Schleswig-Holstein you have to split up your garbage in a number of different garbage bags which you can leave in the garbage station in the time between 10.00 - 11.00 o'clock and from 15.00 - 16.00 o'clock. It is forbidden to leave bags in front of the station.

There are yellow, brown and white bags:

Yellow bags:

For free, plastic litter, cans, all sorts of packages, everything which has a green point on it.

Brown Biological paper bags:

You have to buy at the litter station Leftovers from meals, everything which is biological.

White Bags with CL:

Which you also can buy for the rest of the litter like cigarettes, nappies, used tissues, and paper napkins.

We would be thankful if you would throw empty bottles and everything made of glass into the glass container separated into white and coloured glass.

Please, don't leave the leftovers of meals in the room in which you wash the dishes, throw it in the brown bags and take it back to your caravan.

At the place where you can clean your fish is a bin for the fish guts.

You can empty the chemical toilets into the sink behind the garbage station.

There is a notice board made of glass in which you are able to find some campground-rules.

We thank you very much for your attention on this fact and hope you enjoy your holidays

The owners and staff
